## BluBridge mobile speaker

The BluBridge mobile speaker is one of the smallest Bluetooth wireless speakers and conference phones on the market today. The mobile speaker can be paired with iPhones/iPods, mobile phones, MP3 players, Mac/PCs and more. The speaker provides superior music quality; the DSP button activates Waves award winning MaxxBass® technology for increased bass and warmth from your music. In addition, the mobile speaker includes a built-in speakerphone with noise cancellation technology; you can make and receive phone calls with your mobile phone -- even use with Skype or MSN for free internet calling.

The BluBridge mobile speaker features play/pause, volume +/-, ff/rewind, and DSP buttons. During travel the buttons are protected by a cover that doubles as the speaker stand. The BluBridge mobile speaker is powered by 4 AA batteries, AC wall adapter or USB cable. The BluBridge mobile speaker has a Bluetooth Class 2 extended transmission range of up to 48' (15m). Weight: 11 ounces (without batteries).

Package includes AC wall adapter, USB power cable, 3.5mm stereo cable, protective cloth bag and user manual.

## Bass Enhancement

featuring  **WAVES®**  
MAXX BASS
